Dear Customers,

1st Dec, 2014

Since 1982, Mean Well strive its best in technology in development and manufacturing of standard switch mode power suppliers under our own brand name Mean Well, with highly recognized trademark, see below, registered under European Trademark number 003687753

The goal of Mean Well is to offer total solutions that satisfy our customer's requirements. We have earned a good reputation based on the quality, competitive prices and punctual delivery of our products. Currently, we have around 200 distributors and thousands of customers throughout the world. We have formed long-term associations with most of our customers, working together for many years, developing many treasured relationships. With our great success, in the past years we have noticed that many manufacturers around the world taking Mean Well products as standard format, and making copies of our products. Unfortunately, some of those manufacturers even used a label mark that is highly similar to our European registered trademark,

and giving confusions to the market.

This letter is to officially clarify that Mean Well produces standard products only with our registered trade mark and not associated with any trademark altered from our official trademark. Also, we do not produce product lines that are not listed on official Mean Well website.

If you have any doubts of Mean Well products, we recommend you to contact our authorized distributors in your country, they will be able to assist and offer you the best suitable product, quality, price, delivery, service, and most importantly, as your long term reliable power partner.

A list of authorized distributor can be found on official Mean Well website www.meanwell.com
Please note, Mean Well official global websites are: www.meanwell.com, www.meanwell.eu, www.meanwellusa.com, www.meanwell.com.cn, www.meanwell.cc. Websites other than above are not managed by Mean Well and can be misleading. For any product information, please refer only to official Mean Well websites"

Best Regards

Coleman Liu
