1. Technical description.

1.1. General description.

EXT-POE3DIN extender is a device designed to extend transmission distance of PoE power and Ethernet data via UTP cat. 5/5e twisted pair cable to next 100m. Extender is powered from PoE switch or other PoE-compliant device (PoE IN input). Output voltage and data are available at PoE OUT 1 – 3 outputs, to which cameras or other IP devices using PoE power should be connected. Maximum load current is 0.3A (0.3A/port) and power transmission is realized on pairs 1/2 (-) 3/6(+).

Example of connection:

2. Installation.

2.1. Requirements.

Extenders is to be mounted by a qualified installer, holding relevant permits and licenses (applicable and required for a given country) for low-voltage installations. Unit should be mounted in confined spaces, in accordance, with normal relative humidity (RH=90% maximum, without condensing) and temperature from -10°C to +40°C.

Device is designed for operation in 10 Mb/s or 100 Mb/s Ethernet networks. Connections between the extender and the network device must be made using a min. UTP CAT.5e.

2.2. Installation procedure.

Connect network (Ethernet) cables to RJ45 connectors marked: PoE IN, PoE OUT. Cable from PoE-compliant Ethernet switch connect to PoE IN input, taking into account the current capacity of the output port. To PoE OUT 1 – 3 outputs connect devices, e.g. IP cameras.

3. Maintenance.

The unit requires no special maintenance.

WEEE LABEL
