

CODE: **AWO646 v.1.0/II**
 NAME: **The enclosure with a cable frame 600x600**

APPLICATION

The AWO646 enclosures are used in the ICT and telecommunication sectors. They are designed to store excessive fiber optic cable. The enclosure is compliant with the requirements of the ZN96/TPSA-009 standard.

PRODUCT DESCRIPTION

The enclosure consists of two parts - the cover and the frame. The cross-shaped frame allows storing excessive cable while maintaining a safe bending radius. The possibility of coiling of up to 120 meters of fiber optic cable, depending on its diameter.

The cover protects the cable against mechanical damage. The cover is mounted with a single screw.

TECHNICAL PARAMETERS

External dimensions of the enclosure:	W=600, H=600, D=105 [+/- 2mm]
Frame dimensions:	W ₁ =590, H ₁ =590 D ₁ =90 [+/- 2mm]
Weight net/gross:	7.45kg / 8.45kg [+/-0.1kg]
Material description:	sheet metal DC01, 1,2mm thick, rust protection, colour: RAL 7035
Destination:	Indoor
Closing:	screwed
Declaration, warranty:	RoHS, warranty – 2 year from the production date
