

CODE: **AWZ 700** v.1.0/VIII  
NAME: **Foot-operated panic button PN**

EN

## DESCRIPTION

The panic button is intended for transmitting signal about an emergency situation or calling for help (e.g. to an alarm centre, monitoring transmitter, controller). The alarm button converts the signal of pressing into a status change of the alarm output. The output signal is applied as open/closed contacts of microswitches. The button has a firm, metallic enclosure equipped with non-skid rubber legs.

## SPECIFICATIONS
