DESCRIPTION

The buffer power supply is designed for uninterrupted supply of devices requiring stabilized voltage of **12 V DC (+/- 15%)**. The PSU supplies voltage of **13,8 V DC** with current efficiency of **I = 3 A + 0,3 A battery charging**. In the case of mains power failure, the unit will instantly switch to battery power. The power supply unit is protected against short-circuit, overload and overvoltage.

During normal operation, the total current drawn by the device cannot exceed I=3 A. The maximum battery charging current is 0,3 A. The total current of the receivers + battery is max. 3,3 A.
